

## Student Travel Support

Student travel support is available from the US National Science Foundation ([NSF](#)), pending final approval. Students will receive between \$500 and \$1,000, depending on the number of qualified applicants.

## Eligibility Criteria

All students **enrolled at US based universities** are eligible to apply; however, priority will be given to students presenting papers at ICSM 2012 in any of the conference tracks. Eligibility is limited to students attending US universities and research institutions (including both US and non-US citizens). Students whose advisor has currently NSF funding that can (even partially) support their travel will be lower on the priority list. **We particularly encourage students from underrepresented groups to apply.**

## Application Process

Please send the following items by e-mail to [Denys Poshyvanyk](#) (denys at cs.wm dot edu) by Monday, September 3rd, 2012 (11:59pm EST) with a subject line "ICSM'12 student travel":

- A complete CV, indicating whether a student attended ICSM conferences before.
- A cover letter stating the student's reason for attending ICSM 2012, the title of the paper or tool demonstration to be presented at ICSM 2012 (if applicable), and an approximate budget for traveling and attending ICSM 2012.
- An e-mail from the student's advisor, which should be sent directly by the advisor, confirming the student's eligibility and academic status and whether the advisor has current NSF student travel support.

## Requirements

At the end of the conference, the students who have been selected to receive travel supplements from this NSF grant are requested to provide a one-page report on their research experiences and impressions of ICSM 2012. The reimbursement will be sent to the student upon the receipt of a one-page experience report.

## Contact

For any questions please contact [Denys Poshyvanyk](#) (denys at cs.wm dot edu).
